

CURRICULUM

A7. QUEENSLAND STATE COUNCIL

“That ICPA Qld thank the Queensland Curriculum and Assessment Authority (QCAA) for their quick action, communication and support for all, in response to COVID-19 on the QCE for senior students and the examination process.”

CARRIED

A8. TAMBO BRANCH

“That ICPA Qld lobby the Department of Education to ensure all rural and remote schools are provided with first aid professional training on an annual basis to teach CPR and First Aid to students as part of the curriculum.”

CARRIED

Explanation: Students that attend rural and remote schools cannot readily access ambulance and health care services that can provide this kind of training like their city counterparts. Making age appropriate first aid and CPR training a part of the curriculum could help save lives and provide students with skills that can be used within their communities and homes.
